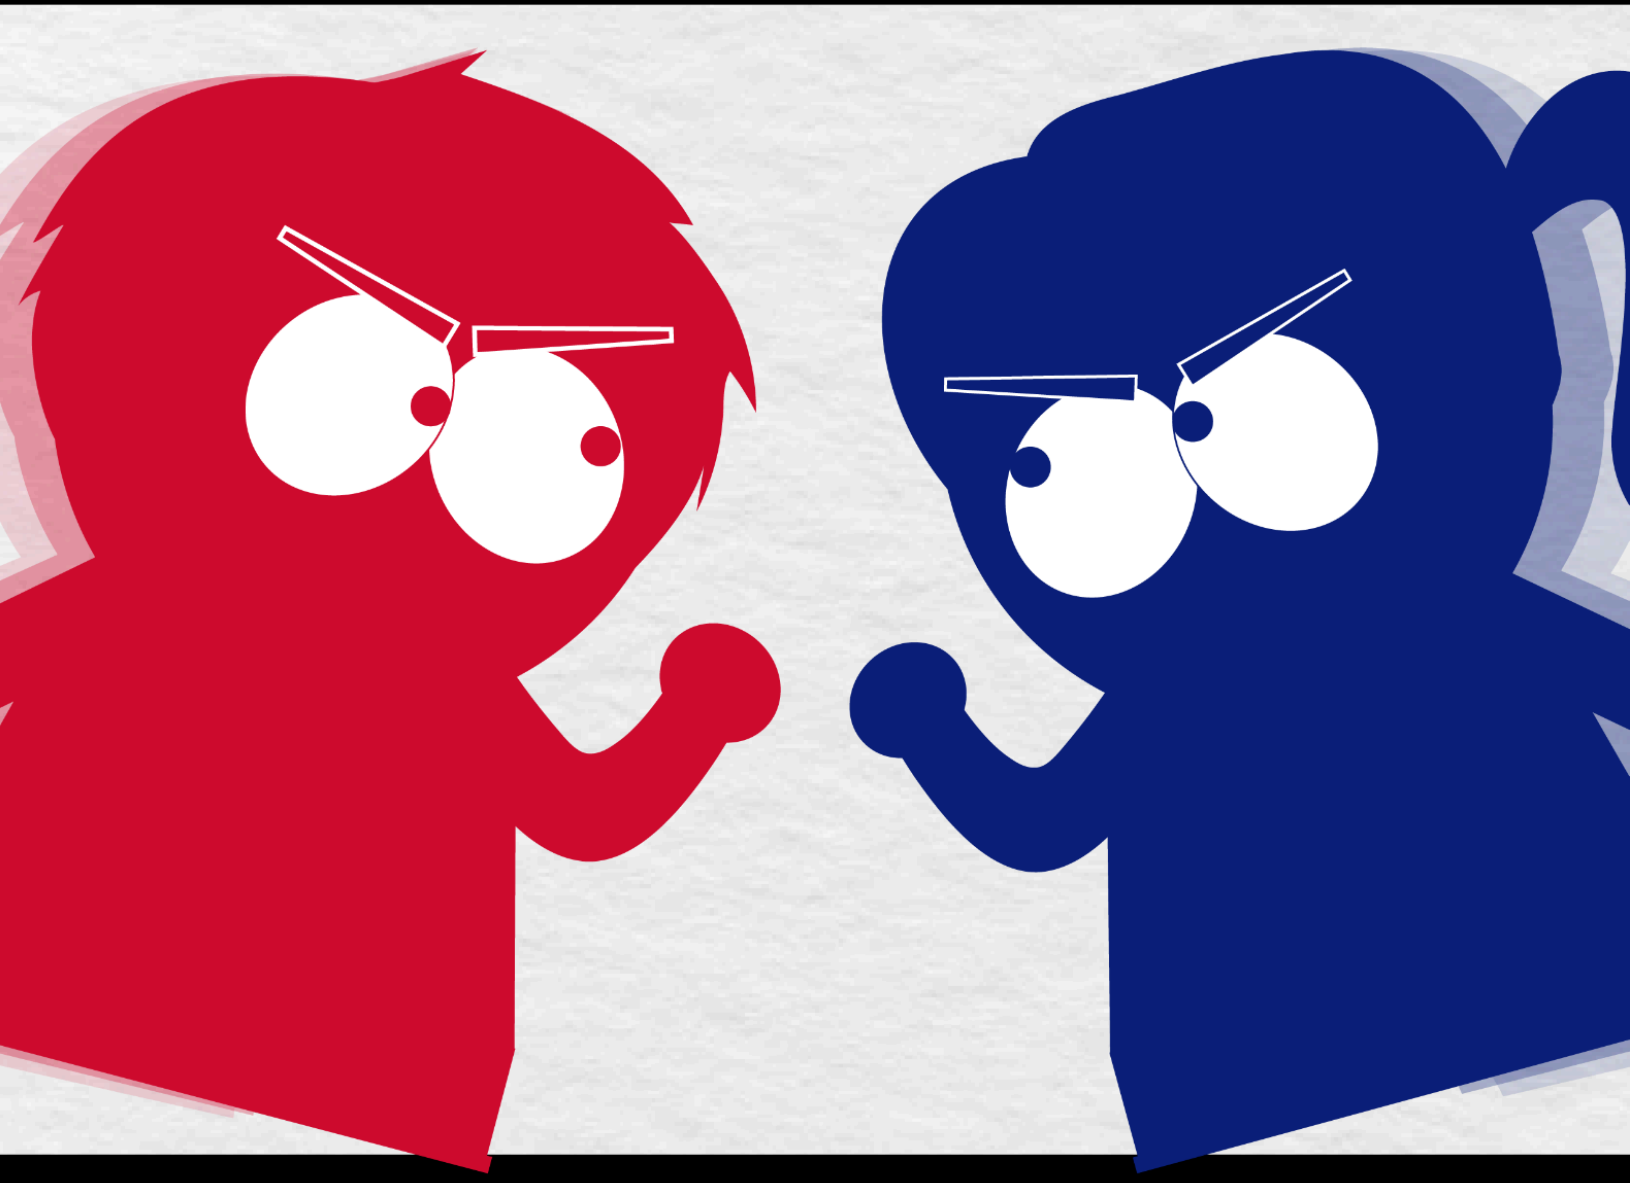
SWIFT x ISACA

RED VS BLUE



BRIEFING PACKET

Competition Overview

Welcome to Red vs Blue, a Cyber Defense Competition hosted by the students of SWIFT and sponsored by ISACA! This year, you're playing as the Humans and Elves as you defend against the Army of Darkness (red team).

In this blue team competition, your goal is to defend against live red team attacks while also keeping your services up and responding to business injects. Teams earn points by service uptime and turning in quality injects. Although not scored, you must mitigate vulnerabilities, misconfigurations, and secure your box so the red team won't take down your scored services.

* Critical services are provided on the Environment Details page, please note there might be other services on your machines that are unscored and not listed in this packet, but they could still be vulnerable to attack.

This RvB competition will be held both in-person and online. For those who are coming in person, the competition will take place in: CBA 162 1001

RvB Schedule	
Briefing	11:30 - 12:00 PM
Competition	12:00 - 4:30 PM
Debrief & Awards Session	4:30 - 5PM

Rules and Tips

Rules:

1. **No paid tools!!**
2. **Do not grief other teams**
3. **Do not access anything outside the provided environment**
4. **Do not access the environment before the competition has started**
5. **The router is out of scope for the Red and Blue team.**

VIOLATORS WILL BE DISQUALIFIED!

Tip: You can copy and paste using pastebin.com

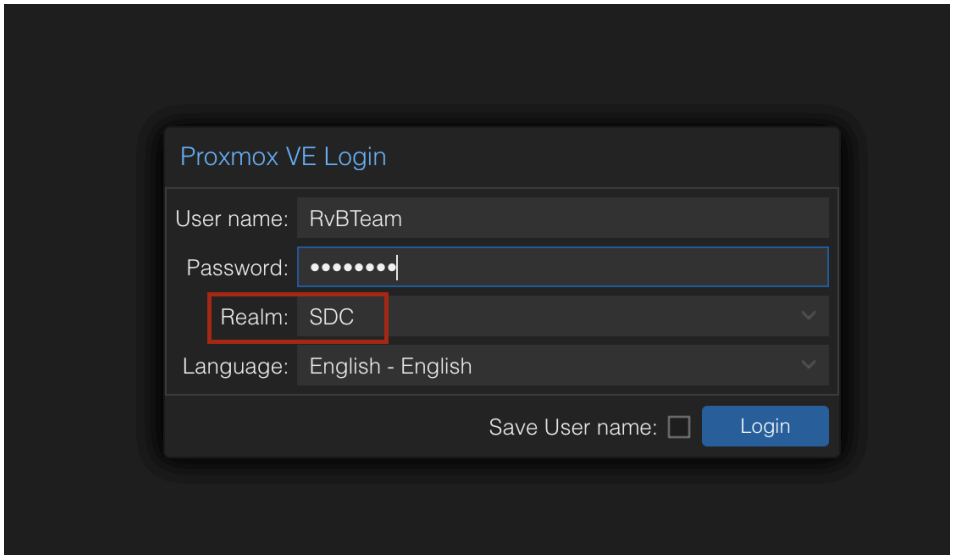
Please Ping @Green Team in your team channel for:

1. **Any technical support for machine access and more**
2. **A consultation/more info about a scored service**
3. **A snapshot revert of a machine at the <u>cost of 500 points</u>**
    a. You may request a revert of any machine at any time however, common usage for a machine revert is when your team or red team has damaged this machine beyond reasonable repair.

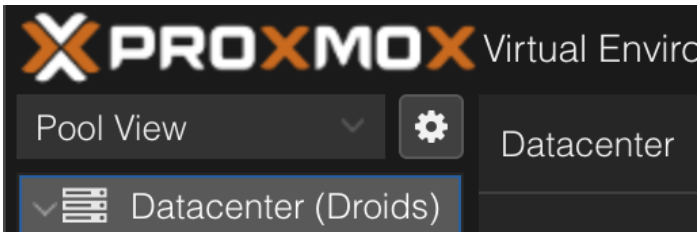
Infrastructure Access

VPN credentials will either be emailed to you or supplied within your respective team channels. Separate credentials to the Proxmox will also be given to you through your team channels. To access the RvB environment:

1. Enable the VPN and login using your credentials
2. Visit https://proxmox.sdc.cpp
3. Select the "SDC" realm and login using the credentials provided in your team channel



4. On the left hand side, you should see your RvB environment.
    a. If you don't see anything, try selecting "pool view" instead.



5. Do NOT turn on any machines before the official competition start time of 12:00PM or you will be disqualified. The exception is your router, which should be on when you enter Proxmox.

Environment Details

Machine	IP Address	Operating System
Tweek Bros Coffeehouse	192.168.1.13	Debian 12
Tegridy Farms	192.168.1.15	Kubuntu
UFO	192.168.1.14	Debian 12
City Wok DC (Domain Controller)	192.168.1.111	Windows Server 2022
City Sushi FS	192.168.1.12	Windows Server 2022

Machine	Service	Port
City Wok DC	Wordpress	80
City Sushi FS	FTP	20/21
Tweek Bros Coffeehouse	SSH	22
UFO	Flask App	80
Tegridy Farms	DNS	53

Note: The Flask App relies on the database on Tweek Bros Coffeehouse

Default Credentials: Default credentials for your machines will be provided at the competition start.

Scoring Engine

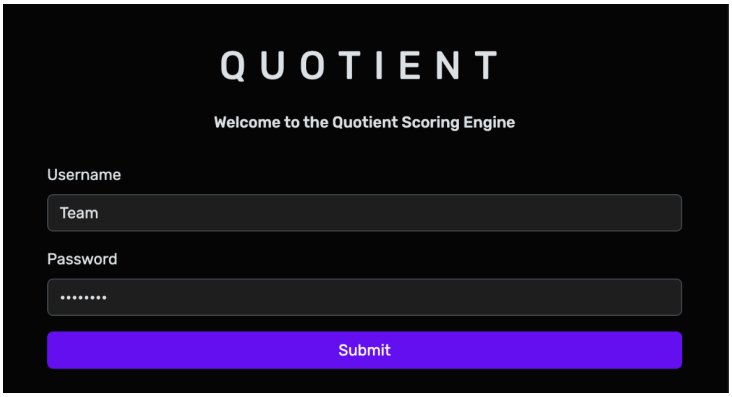
The scoring engine will score points based on the service uptime of the above services. Each service check is worth 5 points per service and will be checked every minute. **HOWEVER**, after 5 consecutive failed service checks, teams will lose 5 points per check for that service.

If you decide to change your passwords on anything, **please use the Password Change Request (PCR)** through the scoreboard using the following format:

User1,password
User2,password

Debug information is also provided through the scoreboard for teams to troubleshoot any failed services.

Note: the scoreboard IP address rotates, so blocking everything except the scoreboard would be invalid.

To access the scoreboard:


1. Turn on the VPN and login with your provided credentials
2. Visit http://172.16.215.250/
3. Login using the credentials provided in your team channels.
